**COMMITTED
TO QUALITY**

We select, develop and commercialize fresh and deep-frozen meats.

The **tradition** of more than 60 years of **experience** in the market supports the **passion** and **commitment** of the team.

The team that safeguards the **quality**, development and **innovation** of our products in order to offer a range of foods and **reliable service**.

Our **guarantee** has been built on the basis of **food safety** and the **adaptability** of the company to changes in the sector, social and technological evolution, and the daily needs of our customers.

The company's trajectory with our I+D department corroborate our **commitment to quality**.

QUALITY IQF

We believe in the meat nutrients and when it comes to food, deep-frozen foods have become the perfect purchase solution for:

The durability of food. We have products whenever we want to prepare recipes with high nutritional value for all types of diets.

Ultra-frozen foods are transparent as they **ensure the nutritional value and organoleptic properties of the food** thanks to the preservation technique. This technique consists of an industrial process that freezes at high speed at -80°C , which allows no ice crystals generation and **products without additives, preservatives or artificial colors.**

OUR PRODUCTION

BLANES

It specializes in the production of all types of hamburgers, minced meats, both in bulk and in grain (IQF) and meatballs. In addition to all Halal production and distribution.

VILAFRANCA

Cutting and processing frozen beef, pork, sheep and poultry products according to the specifications of each client.

**FREE
ALLERGENS
production**

ALL OF OUR PRODUCTS:

Guaranteed tenderness and flavor

Trusted meats and preparations that enhance your recipes by providing flavor and juiciness.

Benefits of deep frozen

Products deep frozen at -80°C , which preserves the organoleptic values of fresh meat for longer.

Perfect cooking even frozen

Possibility of cooking the product directly frozen in a frying pan, deep fryer, oven, grill or air fryer. By not having to defrost the product.

Free allergens

Deep freezing prevents us from using preservatives with allergens (derived from lactose and sulfites). Products without gluten or soy.

No added animal protein

The use of animal proteins causes slight organoleptic changes, the use of vegetable proteins enhances the natural flavor of the meat.

Cost reduction

IQF products make you take out of the bag only what we are going to cook. It adapts the space on the frozen shelf and helps the customer save space in theirs.

PROCESSED MEATS

MEATBALLS

PORK

Selected pork seasoned with mild spices and a touch of garlic.

FOWL

Seasoned chicken and turkey meat.

LOW FAT & SALT

CHICKEN

Chicken meat selected and kneaded with mild spices.
